

COMING SOON!

FLUENT[®]

fluid management

SIMPLIFIED PROCEDURES WITH GREATER
CONTROL FOR HYSTEROSCOPY

- **Simplified** set-up and operation
- **Advanced technology** with intuitive user interface for increased clinical confidence
- **Time-saving** can cut set-up time by 50%

COMING SOON!

FLUENT
Fluid Management System

Help your facility operate more efficiently

1

SIMPLICITY

REDUCED TUBING AND CONNECTION REQUIREMENTS

FLOPAK™ CARTRIDGES

snap into place for
simplified setup

INTUITIVE TOUCHSCREEN

automatically guides
setup and operation

SINGLE-WASTE-BAG DESIGN

eliminates the
need for multiple
canisters

2

TECHNOLOGY

DESIGNED TO INCREASE CLINICAL CONFIDENCE

ACCURATE FLUID DEFICIT READINGS

within +/- 50 mL
(1.69 oz)¹

ADVANCED PRESSURE CONTROL

maintains consistent
intrauterine distention^{2*}

FLOPAK™ TECHNOLOGY

helps manage fluid
use throughout the
procedure

IMPROVED VISUALISATION

for enhanced patient
and procedural
benefits

3

TIME SAVING

STREAMLINE PROCEDURES FOR GREATER CONTROL

SETUP TIME

greatly reduced

ALL-IN-ONE PROCEDURE KITS

give nurses all the
components they need
in one pack

LESS EQUIPMENT REQUIRED

with integrated
MyoSure® controller
to help control
OR space

Fluent can be used with our MyoSure portfolio

For further information speak to your Hologic Sales Rep or visit FluentbyHologic.com

IMPORTANT SAFETY INFORMATION

Not CE Marked – Not for Sale – Not for Distribution.

The Fluent fluid management system is intended to provide liquid distention of the uterus during diagnostic and operative hysteroscopy, and to monitor the volume differential between the irrigation fluid flowing into and out of the uterus while providing drive, control, and suction for hysteroscopic morcellators.

The Fluent fluid management system may not be used to introduce fluids into the uterus when hysteroscopy is contraindicated. The system should not be used to remove pathologies from pregnant patients or patients exhibiting pelvic infection, cervical malignancies, or previously diagnosed endometrial cancer. For detailed benefit and risk information, including contraindications relative to endometrial ablation, please consult the Instructions For Use.

*When operating with a MyoSure device in a bench test environment in a uterine model (N = 20).
